www.linkedin.com/in/vedika-kapoor-4a635a289

SUMMARY

Engineering student passionate about product thinking, data-driven decision making, and user experience. Experience coordinating cross-functional teams, synthesising insights, and building technology products — eager to contribute to a fast-moving fintech product team.

EDUCATION

SRM institute of Science and technology, Chennai, Tamil Nadu
Computer Science in Blockchain Technology

Enrolled: Jul 2023 — Expected: May 2027
Overall GPA: 8.67

EXPERIENCE

Computer Society of India

Secretary

Chennai, Tamil Nadu

Aug 2025-Present

- Led end-to-end planning of a 200+ participant hackathon, coordinating cross-functional sub-teams (logistics, tech, design) using agile sprint-style management — increasing chapter engagement by 40%.
- Defined event requirements, managed stakeholder expectations across 3 sub-teams, and delivered post-event analytics report to chapter leadership — end-to-end PM-style ownership.

Pledge a Smile Foundation

Social Media Marketing

Lucknow,Uttar Pradesh

Jul 2024 – Aug 2024

- Applied behavioural communication principles to grow the foundation's social media following by 18% in 6 weeks, crafting 30+ posts tailored to motivate donor engagement and community action.

PROJECTS

AI-Powered API Monitoring & Alert System – Barclays Hack-O-Hire

Apr 2025-Present

Chennai, Tamil Nadu

- Selected as Top 6 Finalist from 5,000+ national applicants; independently designed and deployed an intelligent anomaly detection system using Isolation Forest and Prophet time-series models.
- Defined problem scope, user requirements, and alert logic for an API monitoring product” — then mention the tech. They care about your product thinking, not just your ML models.

University Management Dashboard-A Full Pern Stack Dashboard

Jan 2026-In Progress

- Owning end-to-end full-stack development of a classroom management platform from database schema design to frontend deployment, implementing JWT-based authentication, role-based access control, and a REST API with 12 endpoints across a PostgreSQL, Express, React, and Node.js stack.
- Managing iterative sprint-based delivery using GitHub Projects, targeting live deployment by April 2026 — demonstrating structured, agile-style ownership of a solo engineering project.

SolarSavvy-India Sustainability and Clean Energy Project

Aug 2025- Present

- Conducted competitor and market research across India's rooftop solar ecosystem to identify product-market fit opportunities and user adoption barriers.
- Applied ML regression models to estimate rooftop solar viability, achieving $\pm 12\%$ error margin across 5 Indian states — demonstrating evidence synthesis and data-driven decision support for sustainability interventions.

SKILLS

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Database Management Systems, Operating Systems, Blockchain Technology, Digital Marketing Fundamental .
- **DSA & Problem Solving:** Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Sorting & Searching Algorithms, Recursion, Hashing; actively practising on LeetCode and GeeksforGeeks.
- **Programming:** Python, Java, C, C++, JavaScript, HTML, CSS, SQL, React.js , FastAPI.
- **Software:** VS Code, Git & GitHub, Streamlit, MongoDB, Elasticsearch, Kibana, TensorFlow , Twilio API, Chart.js, Tailwind CSS.
- **Communication:** Public speaking, technical presentation, teamwork & collaboration, event coordination,Technical writing.
- **Product Analytics Tools:** Figma ,Notion,Google Analytics ,Jira (concepts),Mixpanel (familiar)
- **Competencies:** Market research, competitor analysis, user behavior analysis, sprint planning

Achievements & Competitions

Hack-o-Hire Barclays Hackathon — Top 6 Finalist

Apr 2025

I was Selected among **5,000+ applicants** in a national-level innovation challenge. Built an **AI-Powered API Monitoring & Alert System** that tracks API performance in real time, detects anomalies using machine learning, and sends proactive alerts via Slack to prevent downtime. **Tech Stack:** FastAPI, MongoDB, Elasticsearch, Kibana, React, Tailwind CSS, Slack API, Isolation Forest, Facebook Prophet.

Tech Genius 2K25 — 3rd Runner Up

Sep 2025 Department of Data Science and Business Systems

Developed **PathProof**, a blockchain and zero-knowledge powered supply chain traceability platform to combat counterfeit products by enabling authenticity verification without exposing sensitive business data. Implemented **zk-SNARK Proof of Location**, off-chain **IPFS storage**, and secure smart contracts to ensure verifiable transparency.
